ESD boot C 855 XP Thermo, S3, W10, black, size 44

ATLAS® only uses the best quality cowhides. Extremely careful selection ensures that only flawless, high-quality and soft leather is used, and the ATLAS Waterproof smooth leather has to withstand special challenges throughout the working day. The approx. 2 mm thick full-grain cowhide leather is particularly characterized by its lasting waterproofness and thus ensures dry feet for several hours. It is also particularly breathable, durable and retains its shape. ATLAS® combines state-of-the-art technologies with the anatomical needs of every wearer. The new INNOFLEX SYSTEM® is a holistic running sole concept and supports the runner in every phase of movement. From the first to the last contact with the ground, the sole complex is permanently guided along the same natural force distribution line, the INNOFLEX LINE. It optimally guides the forces from the heel to the toe and thus supports the natural line of force progression. Special areas such as the CLOUDZONE in the heel are responsible for the corresponding energy absorption, i.e. cushioning. The large-format tread surfaces, which are equipped with MPU® material that is particularly energy-absorbent, absorb the energy and return it to the movement sequence in a targeted manner. This guarantees fatigue-free walking throughout the

working day.

With the puncture-resistant XP® technology, ATLAS® offers an innovative system to protect the foot against sharp objects such as nails. A high-tech textile material containing aramid fibers is used for this purpose. This means that increased safety is not at the expense of comfort, as the textile is metal-free, extremely light and supports the natural torsion of the foot. C-TEC® technology: when it has to be metal-free. The anatomically shaped protective toe cap made of high-tech plastic is lightweight and shifts the shoe's center of gravity to the middle of the foot. This actively prevents tripping accidents caused by imbalance. The thermally neutral behavior of this metal-free toe cap also prevents cold bridges inside the shoe and thus guarantees a pleasant foot climate in all seasons. The MPU® overcap offers special protection against abrasion in the toe area, protects the upper leather in this area against premature wear and noticeably increases the service life of the safety shoe.

The ATLAS models with faux fur lining offer warm feet, especially on cold working days. The faux fur lining is soft and comfortable to wear, even in adverse weather conditions. Healthier working with the right cushioning. The new MPU-REBOUND-SYSTEM from ATLAS® enables noticeably gentle and fatigue-free walking. The innovative sole system forms the basis for this outstanding walking comfort and offers pressure relief, cushioning and dynamics for the wearer, thanks to the perfect combination of a pressure-relieving insole and the light and responsive MPU foam. ATLAS® offers you a wide range of different insoles for orthopaedic insole care. The articles marked here are suitable for orthopaedic insoles in accordance with DGUV Rule 112-191. The marking in the shoe is decisive for this.

- MPU INNOFLEX system
- XP metal-free penetration resistance
- Plastic toe cap
- MPU overcap
- Faux fur lining
- MPU REBOUND SYSTEM
- suitable for insoles-DGUV 112-191

Item no.	**WL84460**
Model	C 855 XP Thermo ESD
Manufacturer	ATLAS
Manufacturer article no.	23000-44
GPSR manufacturer data	ATLAS-Schuhfabrik GmbH & Co.KG Frische Luft 159 DE-44319 Dortmund www.atlasschuhe.de
Sales unit	1 pair
Content unit	1 pair

Colour	black
Type of shoes	safety boots
Safety class	S3
Slip resistance	SRC
Shoe width	W10 (standard width)
Shoe size EU	44
ESD compliant	yes
Risk category (PPE regulation)	Category 2
