

ESD sandal CL 46, S1, W12, white, size 45

The CLEANLINE upper material is an innovative high-tech material that is particularly water-repellent, bacteria-inhibiting, breathable and odor-inhibiting. It is particularly suitable for use in hygienically sensitive indoor areas and its special structure makes it particularly light and supple, but at the same time very tear-resistant and durable. ATLAS® combines state-of-the-art technology with the anatomical needs of every wearer. The new INNOFLEX SYSTEM® is a holistic running sole concept and supports the runner in every phase of movement. From the first to the last contact with the ground, the sole complex is permanently guided along the same natural force distribution line, the INNOFLEX LINE. It optimally guides the forces from the heel to the toe and thus supports the natural line of force progression. Special areas such as the CLOUDZONE in the heel are responsible for the corresponding energy absorption, i.e. cushioning. The large-format treads, which are equipped with MPU® material that is particularly energy-absorbent, absorb the energy and return it to the movement sequence in a targeted manner. This guarantees fatigue-free walking throughout the working day.

The anatomically shaped steel toe cap protects the foot in the toe area against impacts of at least 200 joules and a pressure load of at least 15 kN, in accordance with EN ISO 20345:2012. Temperature-regulating properties are not only required, but expected, especially in everyday working life with high physical strain. The aktiv-X functional lining stands for the highest quality, innovative technology and offers the wearer permanent, active moisture regulation. The aktiv-X functional lining has a moisture-regulating effect and ensures that the shoes dry quickly. It does not stain, is skin-friendly and abrasion-resistant. Healthier working with the right cushioning. The new MPU-REBOUND-SYSTEM from ATLAS® enables noticeably gentle and fatigue-free walking. The innovative sole system forms the basis for this outstanding walking comfort and offers pressure relief, cushioning and dynamics for the wearer, thanks to the perfect combination of a pressure-relieving insole and the light and responsive MPU foam.

The ATLAS® clima-stream® concept maximizes breathability, balances moisture inside the shoe and optimally regulates the temperature of the environment. The use of high-quality, particularly breathable upper material, the thermo-regulating inner lining and the Klima Komfort® insole ensure a unique wearing comfort. ATLAS® offers you a wide range of different insoles for orthopaedic insole care. The articles marked here are suitable for orthopaedic insoles in accordance with DGUV Rule 112-191. The marking on the shoe is decisive for this.

- MPU INNOFLEX system
- Steel toe cap
- aktiv-X functional lining
- MPU REBOUND SYSTEM
- clima-stream concept
- suitable for insoles-DGUV 112-191

Item no.	WL84489
Model	CL 46 ESD W12
Manufacturer	ATLAS
Manufacturer article no.	24212-45
GPSR manufacturer data	ATLAS-Schuhfabrik GmbH & Co.KG Frische Luft 159 DE-44319 Dortmund www.atlasschuhe.de
Sales unit	1 pair
Content unit	1 pair
Colour	white
Type of shoes	sandal
Safety class	S1

Products for the electronic industry

Slip resistance	SRC
Shoe width	W12
Shoe size EU	45
ESD compliant	yes
Risk category (PPE regulation)	Category 2
