Needle valve 741V-AL

The 741V series dispensing valve is easy to use and can operate for many millions of cycles without maintenance. Precision needle valves dispense low viscosity fluids in clean and repeatable quantities. Since the stainless steel valve needle terminates directly in the dosing needle inlet, there is virtually no dead volume in the valve. The valves are ideal for use on automatic assembly machines. The air cylinder housing and the liquid housing are made of hard-coated, anodized aluminium.

Item no.	**WL84902**
Manufacturer	NORDSON EFD
Manufacturer article no.	7021235
GPSR manufacturer data	Nordson Deutschland GmbH Kapellenstraße 12 DE-85622 Feldkirchen www.nordson.com

Length	114.6 mm
Width	1.06 mm
Sales unit	1 piece
Content unit	1 piece
ESD compliant	no
