

## Desoldering tip for pin, Ø 3 mm, S1, D530015

This high-quality desoldering tip from the D530 series was specially developed for precise and efficient desoldering of pins and THT components. With an inner diameter of 3 mm, pins with a diameter of up to 2.8 mm can be desoldered. The outer diameter of the D530015 desoldering tip is 5.2 mm. Thanks to the specially shaped tip, it enables precise heat transfer to the soldering area, allowing the solder to be removed quickly and cleanly. The desoldering tip is ideal for use in PCB repairs and ensures gentle treatment of the components. For optimum function, it is important to keep the distance between the pin and the desoldering tip as small as possible, while ensuring optimum air circulation and easy cleaning of the cylinder. This ensures effective suction air circulation, which facilitates desoldering and speeds up cleaning. With its durable construction and high heat resistance, this desoldering tip is the perfect choice for electronics engineers and technicians who value precise and clean work.

Item no. **WL85069**

Manufacturer **JBC**
