

Hi5 X Cut cut protection gloves 4X43E, yellow

The DS Safetywear Hi5 X Cut cut protection gloves 4X43E in yellow and black offer an excellent combination of protection and user-friendliness. With a 13G cut protection shell and a nitrile sand coating on the palms at level E/A5, they are ideal for demanding work environments such as assembly, the oil and gas industry, steel and aluminum processing and the glass industry. The rough nitrile coating ensures a secure grip, while the touchscreen function makes it easier to operate equipment. Trust DS Safetywear for reliable protection and comfort in the workplace.

- yellow/black, rough nitrile coating
- 13G cut protection shell, nitrile sand coating on the palms - level E/A5
- Touchscreen function for optimum user-friendliness
- Application examples: Assembly, oil & gas industry, steel & aluminum processing, glass industry
