

Ultimus V dosing controller 0-100psi

Ultimus™ V provides a high precision benchtop dispensing controller for advanced variable viscosity fluid applications.

The Ultimus V is ideal for applications involving two-component epoxies, UV-curable adhesives and other fluids that thicken over time or thin as ambient temperatures rise. It also delivers consistent and repeatable dispensing results.

With an intuitive RS232 interface, the Ultimus V offers full electronic control of dispense time, pressure and vacuum settings for exceptionally precise deposits. Users can program patterns with up to three different shot sizes. The easy-to-program system ensures that critical fluid dispensing processes remain consistent from start to finish

Item no.	WL85584
Manufacturer	NORDSON EFD
Manufacturer article no.	7012590

GPSR manufacturer data	Nordson Deutschland GmbH Kapellenstraße 12 DE-85622 Feldkirchen www.nordson.com
Sales unit	1 piece
Content unit	1 piece
Colour	blue
Incl. battery	no
ESD compliant	no
