

Aluminum rail 50 ESD-CON, aluminum/PP, dissipative, silver/black, 50 x 65 cm

Discover the versatile aluminum rail 50 ESD-CON from Licefa, available at Weidinger.eu. This high-quality wall rail made of aluminum, measuring 50 x 65 cm, combined with polypropylene elements in elegant silver and black, is the ideal solution for electronics production. With item number 8169092, it offers a robust and flexible option for attaching work trays, especially suitable for models 130 and 210.

The aluminum rail is supplied with two black PP end caps as well as the necessary screws and plugs, ensuring simple and secure installation. A special highlight is the integrated push button, which enables the attachment of spiral cables and a wrist strap, which is included in the scope of delivery. This functionality supports ESD safety and ensures an organized and efficient working environment.

Benefit from the well thought-out design and high quality of this aluminium rail, which optimizes your work processes and increases safety in your electronics production.
