

ESD storage stand DTS for DT530

The DTS stand works exclusively with the DT530 angled desoldering iron and the DDE and DME control units.

Features:

- Efficient maintenance solutions: The stand and quick-change filters make maintenance easier and safer - for smooth and safe operation.
- Intelligent heat management automatically detects the tool in the stand and lowers the peak temperature below the solder melting point. The hibernation function interrupts the power supply to prevent oxidation. This extends the service life of the soldering tip by up to 5 times.
- The tip cleaner with brass wool as well as the splash guard and anti-splash membrane keep the work area clean and free of solder particles. The stand allows up to four tips to be stored using the tip holder.
- The position of the tool holder can be easily adjusted to your needs and the cable collector has been designed for perfect movement adjustment and to keep cables away from the work area.

Products for the electronic industry

Item no.	WL86677
Manufacturer	JBC
Manufacturer article no.	DT-SB
Length	340 mm
Width	160 mm
Height	120 mm
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	yes
