

Solder wire guide nozzle for ALE250, curved

The curved guide nozzle is designed for use with the ALE250 soldering iron with automatic feed and works with the specific cartridge range C245. It allows for easy adjustment, especially when reaching difficult solder joints in narrow or awkward positions. This curved guide is compatible with wires from \varnothing 0.8 - 1.2 mm / 0.031 - 0.047 in with and without solder wire perforation.
