900 watt hot air convection system, 230 V

The HCT-910 hot air rework system is a powerful, versatile solution for a wide range of production and rework challenges.
It features a compact, robust design with a digital display and an encoder knob for real-time control of temperature and airflow.
The user-friendly interface, quick-change nozzles and illuminated start/stop button allow the operator to maximize productivity in a safe environment.
Ideal for professional SMD repairs, preheating and soldering processes

- Powerful 900 W hot air station
- Temperature electronically adjustable from 50-600 °C
- Up to 120 l/min
- Digital buttons and clear display
- Start/stop button directly on the handle
- Brushless fan unit
- ESD-safe
- Compact design

- Includes storage stand and 5 mm bayonet nozzle
- Nozzles can be replaced without tools

Item no.	**WL87497**
Manufacturer	METCAL
Manufacturer article no.	HCT-910-21
GPSR manufacturer data	OK International Ltd Eagle Close, Chandlers Ford GB-SO53 4NF Hampshire www.metcal.com
Width	140 mm
Height	140 mm
Sales unit	1 piece
Content unit	1 piece
Colour	orange, black
Power	900 W
Voltage	230 V
Temperature range °C	50 – 600 °C
Station (type)	hot air station
ESD compliant	yes
