

ESD floor covering "SafeGrip", roll material, dark gray, 3.5 mm thick, 1500 mm x 10 m

The SafeGuard "SafeGrip ESD" is a robust ESD floor covering for areas where electrostatic discharge must function reliably. Thanks to its thickness of 3.5 mm, it is particularly resistant and is also suitable for areas subject to heavy use, for example in production, assembly, warehouses or ESD protection zones.

The ESD floor covering in the color graphite snow grey has a width of 1500 mm and is available as a 10 m roll. The floor covering is installed by gluing with a conductive ESD adhesive.

- ESD floor covering in rolls
- Color: Graphite snow grey
- Roll size: 10 x 1.5 m
- Thickness: 3.5 mm
- Installation with conductive ESD adhesive
- Suitable for high loads

Item no.

WL87668

Manufacturer	SAFEGUARD
GPSR manufacturer data	Weidinger GmbH Hertha-Sponer-Str. 1a DE-82216 Gernlinden
Length	10000 mm
Width	1500 mm
Height	3.5 mm
Sales unit	1 rolls
Content unit	1 rolls
Manufacturer colour information	Graphite snow gray
Colour	dark grey
Material	Synthetic rubber
Incl. battery	no
Typical surface resistance (Rpp)	$10^6 - 9 \cdot 10^7$ Ohm
Surface texture	flat
Type of surface	floor mat
ESD certification according to IEC 61340-5-1:2016	yes
Properties of the covering	abrasion-resistant, smooth
Incl. earthing cable	no
Incl. earthing point	no
ESD compliant	yes
