Depth-adjustable cross connector for Concept Ergo 2000 mm

The depth-adjustable cross connector for Concept Ergo worktables was designed to ensure maximum flexibility when mounting accessories. It is used in particular for attaching the 860136-49 or 860196-49 foot supports and the 860551-49 PC/printer holder, which are mounted directly on the cross connector. For optimum positioning, the cross connector has six adjustment holes with a grid dimension of 50 mm. This enables ergonomic and application-oriented attachment of the components. On a worktable with a depth of 750/900 mm, the foremost drill hole is 415 mm from the front edge of the table.
• Compatible with Concept Ergo Allen key or EL models
• Required for foot supports 860136-49 and 860196-49 and for CPU/printer holder 860551-49
• Six holes for depth adjustment in 50 mm increments (for 750 mm and 900 mm deep tables, the front hole is 415 mm from the front edge of the table top)

Item no.	**WL87741**
Manufacturer	TRESTON
Manufacturer article no.	DBCE2000-49
GPSR manufacturer data	Treston Deutschland GmbH Frankfurter Str. 101 DE-65479 Raunheim www.treston.de
Width	2000 mm
Sales unit	1 piece
Content unit	1 piece
Colour	light grey
ESD compliant	yes
