

Combination wrench set, 22-piece

As installation spaces are becoming increasingly tight for screwdriving work, tools are required that enable users to work successfully in such situations. Tight installation spaces require additional attachment points for the tool. So can open-end wrenches be modified in such a way that the tool's contact points are increased? The combination of the 7.5° swiveled jaw and the double hexagon geometry doubles the contact points. With a repeated 180° rotation of the wrench around the longitudinal axis during screwdriving, there are four tightening options and nuts or screw heads can be "gripped" every 15°. The Joker 6003 with its clever jaw geometry significantly extends the range of applications in tight installation spaces. The Joker 6003 finds the respective starting point automatically, so to speak, after every turn. The slim yet robust ring side is angled at 15° to the tool axis. The high-quality surface coating ensures high and long-lasting corrosion protection. With Take it easy tool finder: color coding according to size.

- 22-piece combination wrench set - particularly suitable for tight installation spaces
- The special jaw geometry extends the tool's application options
- The small return angle in the jaw "grabs" the screw every 15°

- Slim, 15° angled ring side

Item no.	WL88832
Model	6003 Joker 22 Set 1
Manufacturer	WERA
Manufacturer article no.	05020232001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzerter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Length	383 mm
Width	138 mm
Height	53 mm
Length with packaging	383 mm
Width with packaging	138 mm
Height with packaging	53 mm
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
VDE	no
ESD compliant	no
Number of parts in the tool set	2-piece
