Combination wrench set, 11-piece

Combination wrench set, 11-piece, metric sizes; on clamping bar. The Joker 6003 achieves a doubling of the contact points thanks to the combination of the 7.5° angled jaw and the double hexagon geometry. With a repeated 180° rotation of the wrench around the longitudinal axis during screwing, there are four contact points and nuts or screw heads can be "gripped" every 15°. This makes fastening much easier, especially in tight spaces. The slim yet robust ring side is angled at 15° to the tool axis. The high-quality surface coating provides high and long-lasting corrosion protection. With Take it easy tool finder: color coding according to size. The clamps on the strip ensure that the tools are held perfectly in place. The strip holds securely to metal surfaces thanks to a strong magnet. Alternatively, the strip can also be screwed to a wall.

- 11-piece
- The strip holds securely to metal surfaces with a strong magnet. Alternatively, the strip can also be screwed to a wall.
- The clamps on the strip ensure that the tools are held perfectly in place
- Particularly suitable for tight installation spaces
- The special jaw geometry extends the application possibilities of the tool

Item no.	WL88833
Model	9640 Magnetleiste 6003 Joker 1
Manufacturer	WERA
Manufacturer article no.	05020233001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzerter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Length	380 mm
Width	160 mm
Height	45 mm
Length with packaging	380 mm
Width with packaging	160 mm
Height with packaging	45 mm
Sales unit	1 piece
Content unit	1 piece
VDE	no
ESD compliant	no
Number of parts in the tool set	11-piece
