

Combination wrench set, imperial, 8-piece

As installation spaces are becoming increasingly tight for screwdriving work, tools are required that enable users to work successfully in such situations. Tight installation spaces require additional attachment points for the tool. So can open-end wrenches be modified in such a way that the tool's contact points are increased? The combination of the 7.5° swiveled jaw and the double hexagon geometry doubles the contact points. With a repeated 180° rotation of the wrench around the longitudinal axis during screwdriving, there are four tightening options and nuts or screw heads can be "gripped" every 15°. The Joker 6003 with its clever jaw geometry significantly extends the range of applications in tight installation spaces. The Joker 6003 finds the respective starting point automatically, so to speak, after every turn. The slim yet robust ring side is angled at 15° to the tool axis. The high-quality surface coating ensures high and long-lasting corrosion protection. With Take it easy tool finder: color coding by size. Thanks to the Velcro system on the back, the Joker pockets can be attached to walls, shelves, workshop trolleys and the Wera 2go system.

- Particularly suitable for tight installation spaces

Products for the electronic industry

- The special jaw geometry extends the application possibilities of the tool
- The small return angle in the jaw "grabs" the screw every 15°
- Slim, 15° angled ring side
- Suitable for docking onto the Wera 2go system

Item no.	WL88837
Model	6003 Joker 8 Imperial Set 1
Manufacturer	WERA
Manufacturer article no.	05020241001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzerter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Length	297 mm
Width	100 mm
Height	65 mm
Length with packaging	297 mm
Width with packaging	100 mm
Height with packaging	65 mm
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
VDE	no
ESD compliant	no
Number of parts in the tool set	8-piece
