Double open-end wrench, 27 x 32 x 305 mm

High-quality, metric double open-end wrench from Wera: Everything a wrench needs to be able to do. And much more. Faster, better, more beautiful. A real joker. The new generation of open-end ratchet wrenches. For hexagon screw heads and nuts. With a holding function thanks to a metal plate in the jaw, which reduces the risk of losing nuts and bolts. The replaceable metal plate in the jaw secures screws and nuts with extra hard teeth and reduces the risk of slipping. The integrated end stop can prevent the screw head from slipping downwards and enables high torques to be applied. The double hexagon geometry ensures a positive connection with the screw or nut and thus reduces the risk of slipping. A reverse swivel angle of just 30° avoids time-consuming turning of the wrench when screwing. The special forging geometry ensures high torque transmission and high bending stiffness. Manufactured from high-performance chrome-molybdenum steel with nickel-chrome coating for high corrosion protection. With Take it easy tool finder: color coding by size.

- With practical holding function thanks to metal plate in the jaw
- No slipping due to end stop
- Double hexagon geometry reduces the risk of slipping
- Swing-back angle of only 30°
- With Take it easy tool finder: color coding according to size

Item no.	**WL88842**
Model	6002 Joker
Manufacturer	WERA
Manufacturer article no.	05020263001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzerter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Length	370 mm

Width	77 mm
Height	20 mm
Length with packaging	383 mm
Width with packaging	138 mm
Height with packaging	53 mm
Sales unit	1 piece
Content unit	1 piece
VDE	no
ESD compliant	no
Tool length	305 mm
Wrench size	27 mm, 32 mm
