

Self-adjusting double open-end wrench, 2-piece

2-piece set. Self-adjusting double open-end wrenches for hexagon screw heads or nuts with width across flats 7-10, 10-13 (metric) or 1/4"-3/8", 7/16"-8/16" (imperial) and 13-16, 16-19 (metric) or 1/2"-5/8" and 5/8"-3/4" (imperial). The infinitely variable and parallel jaws replace several individual open-end wrench sizes. The required size adjusts itself steplessly when applied to the hexagon nut or screw. The integrated lever mechanism clamps the hexagon bolt or nut securely between the jaws, which significantly reduces the risk of slipping and damage. The ratchet function ensures fast and continuous screwing without setting down. By using the corner width prisms, a return angle of just 30° can be achieved. The ratchet function and corner width prism make it possible to work even in tight installation spaces. The adjustable double open-end wrench Joker 6006 with ratchet function is the universal screwdriving tool. Self-adjusting. Gripping. Ratcheting. In a robust case.

- Self-adjusting double open-end wrenches
- The Joker 6006 self-adjusting combination wrenches cover all metric and imperial dimensions in the respective application area
- Automatic and stepless gripping of hexagon bolts and nuts

- Lever mechanism when gripping prevents slipping and damage
- With mechanical ratchet function for fast and continuous tightening without having to put the wrench down

Item no.	WL88851
Model	6006 Joker 2 Set 1
Manufacturer	WERA
Manufacturer article no.	05020340001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzerter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Length	98 mm
Width	284 mm
Height	45 mm
Length with packaging	98 mm
Width with packaging	284 mm
Height with packaging	45 mm
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
VDE	no
ESD compliant	no
Number of parts in the tool set	2-piece
