

## TORQUE® Mplus bit set, 10 x 50 mm

High-quality bits for TORQ-SET® screws. Due to stronger flanks than with the conventional TORQ-SET® profile, approx. 70% more breaking torque is achieved with a precise fit in the screw, resulting in a longer tool life. Diamond coating of the bits ensures a secure fit in the screw, reduces the required contact pressure and reduces the risk of slipping. 1/4" hexagon, suitable for DIN ISO 1173-F 6.3 holders.

- For TORQ-SET® screws
- Mplus for more breaking torque and longer service life
- Diamond coating for a secure fit in the screw
- 1/4" hexagon drive (Wera connection series 4)
