TORX® PLUS bit, 10 IP x 50 mm

High-quality bits for internal TORX PLUS® screws. TORX PLUS® profile: Compared to the "normal" TORX® profile, the enlargement of the 6 torque-transmitting flanks between tool and screw is realized by an elliptical and not circular profile structure. This distributes the applied force over a larger area when screwing. Higher torques are transmitted and the service life of the screw and tool is also increased. Tough and hard, for universal use. 1/4" hexagon, suitable for DIN ISO 1173-F 6.3 holders.

- For internal TORX PLUS® screws
- Tough and hard, for universal use
- 1/4" hexagon drive (Wera connection series 4)
