

## Cover MD 110 for ultrasonic bath, sound-absorbing, 670 x 550 x 70 mm

---

A suitable stainless steel lid for an ultrasonic bath reliably protects the bath liquid from external contamination and at the same time prevents unpleasant odors from added cleaning or disinfection products. The lid also has a sound-absorbing effect and therefore contributes to a more pleasant working environment. Thanks to its design, which directs any condensation back into the tray, the cleaning process remains hygienic and efficient. In addition, the closed lid helps to shorten the heating phase, as less heat escapes and the temperature in the bath is reached more quickly.

- Protects the bath fluid from contamination
- Sound-absorbing
- Shortens the heating phase
- Covering the oscillating tank when the basket is suspended
- Special lid shape: rising condensation drips back into the appliance tray
- Thermally insulated plastic handle

- Suitable for RM 110, RM 112 and ZM 112 appliance series

<b>Item no.</b>	<b>WL92020</b>
Manufacturer	SONOREX
Manufacturer article no.	8446
Length with packaging	670 mm
Width with packaging	550 mm
Height with packaging	70 mm
Sales unit	1 piece
Content unit	1 piece
Shape	rectangular
Material	Stainless steel
Incl. battery	no
