Portable display 8.6" for B.IRON

The device has an 8.6-inch glass display and an integrated Android operating system, which enables structured and clear operation.
The latest version of the B.IRON app is installed for configuring and controlling the system.
An integrated 5000 mAh battery and 64 GB of internal memory (ROM) are available for mobile use, for example for storing process and soldering data.
If required, the display can be operated directly from the USB port and charged at the same time using the USB cable supplied.
