

Cleanroom swab long shaft, 163 mm, polyester knitted fabric, cleanroom class ISO 5, 100 pieces

This polyester cleanroom swab was developed for cleaning requirements in controlled cleanroom environments. The polyester knitted head and polypropylene shaft make this swab particularly suitable for applications such as the application and removal of lubricants, adhesives and solutions, as well as for cleaning low-lying areas and connections.

The paddle tip design in combination with the long cylindrical shaft enables cleaning of areas that are difficult to reach with conventional swabs, such as O-ring grooves, pipes and recesses.

Dimensions of the swab

- Total length: 163 mm
- Tip length: 17 mm

- Tip diameter: 7 mm
- Shaft diameter: 3 mm

Areas of application

- Application and removal of lubricants, adhesives and solutions
- Cleaning of deep areas and recesses
- Cleaning O-ring grooves, pipes and connections
- Removal of excess material and particles
- Removal of fine powders
- Cleaning of transitions and connection surfaces
- Suitable for cleanroom environments with defined cleanliness requirements
- Polyester knitted head with high absorption capacity
- Thermally bonded construction - no adhesive contamination
- Double-layered polyester fabric for improved fluid absorption and cleaning performance
- Low non-volatile residue (NVR) and low ionic content
- Antistatic behavior due to controlled material properties
- Abrasion-resistant design to reduce particle and fiber release
- 100% polypropylene shaft with high chemical resistance
- Long cylindrical shaft for hard-to-reach areas
- Silicone-free packaging

Item no.	WL93462
Manufacturer	DS SAFETY WEAR
Manufacturer article no.	DPS740
GPSR manufacturer data	DS SafetyWear Im Rohnweiher 14 DE-53797 Lohmar www.dssafetywear.de
Sales unit	1 PU
Content unit	100 piece
Incl. battery	no
ESD compliant	no
