ZIP+ Digital Microscope

This entry-level microscope is ideal for simple magnification tasks requiring magnification between 1.7x and 53x.

Don’t be fooled by its simple design. The ZIP+ is made from high-quality materials and offers a durable solution used by professionals in various industries.
• It has a wide magnification range: 1.7x – 53x
• With just one height adjustment, it’s incredibly easy to use and requires minimal adjustments to the settings
• It’s lightweight and can be easily transported between workstations or locations
• It has no software features, making it the perfect entry-level product for simple magnification tasks
• You can take photos of your results (or share them in online meetings like Teams) by connecting the microscope to a computer using generic drivers

Included +4 lens:

- Suitable for a field of view of: 11 mm – 290 mm / 0.41" – 11.42"
- Magnification: 1.7x – 53x
- Objective-to-object distance: 250 mm / 9.84"
- Objective diameter: 58 mm / 2.28"
- Achromatically corrected? Yes

Item no.	**WL93558**
Model	ZIP+
Manufacturer	TAGARNO
