

Unité d'observation en biais pour DSZ-44

The OI 250.01.000 oblique viewing unit from 4H JENA is a practical extension for the DSZ-44 stereo microscope and enables comfortable viewing from an oblique angle. With a viewing angle of approx. 60°, it is ideal for applications where lateral viewing or ergonomic working is required.

The unit can be rotated through 360° for maximum alignment flexibility. The integrated 0.5x lens also extends the range of applications and ensures an adapted magnification with a larger field of view.

The robust design ensures reliable use in the laboratory, in production or for testing and inspection tasks. An ideal addition for precise work under the microscope.

- Avec objectifs 0,5x
- Pivotant à 360°
- Env. 60°
