

Panne à souder, série 900M, pointu D: 2 mm

The Type M Format S4 soldering tip from HAKKO is a straight, pointed replacement tip for HAKKO soldering irons from the 907, 913 and 951 series as well as the FX models 8801, 8802 and 8803. It is specially designed for precise work on fine solder joints and is ideal for PCB assembly, electronics repairs and prototype construction.

With a diameter of 2 mm and a tip length of 15 mm, the pointed shape enables precise solder placement and controlled heat transfer. The straight alignment ensures even force transfer to the solder joint and makes it easier to work on densely populated components.

The tip is part of the 900M series and is compatible with numerous handpieces, including 907, 913FE, 951 as well as 928, 937, 701, 702B, 936, 933 and 934. The soldering tip is easy to replace and can be fitted quickly, ensuring that the soldering station is always ready for use.

Thanks to the high-quality workmanship, the soldering tip is durable and offers repeatable precision for professional soldering work. It ensures clean, reliable results, even for fine and complex soldering projects.

• Formulaire B

Numéro d'article	WL21784
Modèle	900M-T-S4
Fabricant	HAKKO
Numéro d'article du fabricant	900M-T-S4
Données du fabricant du GPSR	TBK - Technisches Büro Kullik GmbH Industriestrasse 27 DE-56276 Großmaischeid www.kullik.com/

Longueur	125 mm
Largeur	48 mm
Hauteur	5 mm
Unité de vente	1 pièce
Unité de contenu	1 pièce
Batterie incluse	non
Série de produits	900M
Série de conseils	900M
Longueur de la pointe	15 mm
Diamètre de la pointe à souder	2 mm
Forme de la pointe	pointu
Alignement des pointes	droit
Pièce à main assortie	907, 913FE, 951
Conforme aux normes ESD	non
