

## Pompe à vide pour pompe à dessouder MS9014

The vacuum pump for the MS 9014 desoldering pump from JBC is an indispensable tool for precise and efficient soldering work. Developed for professional use, it offers reliable performance and a long service life. The pump is characterized by its high suction power, which enables quick and clean removal of solder. This reduces working time and increases efficiency during repair and maintenance work. The compact design facilitates integration into existing work environments, while the robust construction ensures high durability. Ideal for electronics workshops and industrial applications, the vacuum pump is a valuable addition to any soldering station.
