

Prese a sfera e prese ESD, con scarico Schiuma a innesto in PE, 130x32x14 mm

The ESD ball hinge box from WARMBIER is a compact and reliable solution for the safe storage and transportation of sensitive electronic components. With its dimensions of 130 x 32 x 14 mm, it is ideal for small components that need to be protected from electrostatic discharge.

Made of permanently volume conductive plastic with carbon content, the box offers a typical discharge resistance of 10^4 to 10^5 ohms and thus ensures controlled discharge of electrostatic charges. Inside, a conductive PE plug-in foam ensures a secure hold and additional protection for the components.

The lid with ball hinge makes it easy to open and close, while the ESD marking clearly indicates suitability for use in ESD protection zones.

Ideal for applications in electronics production, laboratories, warehouses and shipping, where reliable ESD protection and structured storage are essential.

- Plastica volume-conduttiva permanente attraverso il carbonio

- Con schiuma a innesto PE a conduzione permanente
- Coperchio con marcatura ESD

Articolo n.	WL21021
Modello	5100.862
Produttore	WARMBIER
Codice articolo del produttore	5100.862
Dati del produttore GPSR	Wolfgang WARMBIER Untere Gießwiesen 21 DE-78247 Hilzingen www.warmbier.com
Lunghezza	130 mm
Larghezza	130 mm
Altezza	14 mm
Profondità	32 mm
Unità di vendita	1 Pezzo
Unità di contenuto	1 Pezzo
Informazioni sul colore del produttore	nero
Colore	Nero
Materiale	Plastica
Incl. batteria	No
Resistenza tipica alle perdite	$10^4 - 10^5$ Ohm
Conforme alle ESD	Si
