

Braccio girevole Pass-O-Mat a doppia unità, con azionamento a motore

The Gunnebo OverGate is a unidirectional motorized swing gate originally designed for access control and customer guidance in retail stores. It is also a valuable and cost effective entrance solution that exists in security installations alongside turnstiles or other products. It is available in right, left or double configurations with standard arm length. The OverGate is manufactured from 304 polished stainless steel (only available in the OverGate C0 version) and has the same Gunnebo finish as the Gunnebo turnstile, making it a perfect match. The OverGate entrance gate is equipped with an anti-panic device: When an appropriate force (approximately over 110N) is exceeded, the swing gate disengages to create a clear exit in both directions. The OverGate Entrance Gate also has a push button control to operate the unit and is fitted as standard with white signage with an arrow on the opening side and a 'No Entry' sign on the opposite side. Other signage options are also available. The system opens and closes at adjustable intervals from 0 to 15 seconds.

- Totale B = ca. 2050 mm
- Anta B = ca. 860 mm
- Passaggio libero B = ca. 1750 mm
- Altezza di blocco dell'anta = ca. 890 mm
- altezza della colonna = ca. 1170 mm
- Angolo di apertura = 90°
- serratura motorizzata controllata da un'unità di controllo esterna
- Nota: Il prezzo non comprende l'installazione del sistema

Articolo n.	WL38842
Modello	Pass-o-Mat Doppelanlage
Produttore	GUNNEBO
Codice articolo del produttore	232995010-950100300-230283100
